Letter of Thanks

To The Islamia University of Bahawalpur (IUB), Pakistan

Last year, with the support and cooperation of your prestigious university, we successfully organized the online seminar on Climate Smart Agriculture for Pakistan from 30 November to 2 December, commissioned by the Ministry of Agriculture and Rural Affairs of the People's Republic of China (MARA). Professors and experts from universities and agencies have elaboration and discussion on topics of Prospect and Outlook of Climate Smart Agriculture, Climate Smart Grassland Ecosystem Management, Construction of Ecological Farm, Low-Carbon Villages and Towns, etc. Participants said that they learned about the concepts and trends in climate smart agriculture, exchanged information on the current status of smart agriculture in both countries, and strengthened their interest in further cooperation.

We are truly grateful for your joint efforts! And our special thanks go to Dr. Wajid Nasim Jatoi for his considerate work of collaboration and coordination. We highly appreciate the direction of Professor Dr. Shazia Anjum on seminar work and future cooperation. Climate smart agriculture plays a vital role in national food security and sustainable development in the context of climate change. We wish that both of us continue to strengthen cooperation and work together to promote environmentally friendly development of agriculture.

Best wishes,

Mo Dan, Vice President
Administration and Management Institute of MARA (AMI)
